

CAREERS CURRICULUM

We want our students to fully understand the huge range of possibilities out there and make the most of their talents. We aim to help develop students' knowledge, understanding, confidence, and skills so that they can make well-informed choices and plans. The Careers curriculum is embedded across the school and follows a spiral curriculum model, meaning that, year-on-year, our students build knowledge and skills across key employment skills areas from Year 7 to Year 13 and beyond. We strive to ensure students experience a full, varied and interesting careers journey, having the opportunity to explore their own interests, skills, and passions; understanding the wealth of jobs and education available to them once they leave school. It is integrated into our students' experience across the whole curriculum and is based on a partnership between students and their parents. We have a rich partnership with local businesses, colleges and universities along with a strong alumni and wider school community to support our Careers Education with a Catholic vision.
